

Tyler's Odyssey Jail Manager

Automate your jail with Tyler's Odyssey[®] Jail Manager—experience the comprehensive, robust and empowering jail management solution. Whether your facility is large or small, Jail Manager has the scalability and flexibility to meet your needs.

Integrated

As with all Odyssey applications, Jail Manager is completely integrated, allowing immediate access when and where you need it. Access, view and track detailed inmate data including medication information, commissary purchasing history, charge history and more. With Odyssey Jail Manager you can:

- Auto-check for warrants upon release, arrest and during inmate visitation
- View inmate hearing schedules
- Track inmate movement with configurable alerts and hand-held devices
- Track gang affiliations with automated warnings
- View bond history and status
- Track charge history and disciplinary actions
- Record inmate contacts and activities
- Seamlessly integrate with Live Scan fingerprint machines
- Share offender warnings, flags and critical information across all Odyssey applications

Jail Manager also features integrated document management capabilities, providing you with the most powerful and flexible solution available.

Configurable

Jail Manager is designed to meet your jail system's unique management needs, whatever they may be. Unprecedented flexibility enables you to customize reports, questionnaires, track inmate visitation and mail. With Odyssey Jail Manager you can configure:

- Highly customizable booking checklists to match your current workflow
- Mug shots and video lineups
- Medical, suicide and point-based questionnaires
- Scheduled reports to run automatically and email designated recipients when complete
- Automated jail data exports with user-definable interfaces for phone systems, inmate kiosks, commissary and more.

Jail Manager also features integrated document management capabilities, providing you with the most powerful and flexible solution available.

Secure

Jail Manager's architecture was designed with powerful and flexible security built in. You have total control of who has access to which information on your system.

Odyssey Sets the Standard

Tyler's Odyssey solution sets the standard for courts and justice software with unprecedented scalability, integration capabilities and Web-based navigation. That was true when it was originally introduced and, through continued innovation, it's still true today.

Empower your **ORGANIZATION** with Tyler's Odyssey **SOLUTION**

Tyler's Odyssey Jail Manager

Public Access

Tyler's Odyssey Public Access application enables varying levels of security and access to jail information for citizens, attorneys, bond companies and justice partners. Using the power of the Internet, Public Access can be integrated with a variety of jail data. It can run on a replicated database so that vital court production data remains secure. Free up staff to concentrate on the job at hand rather than fulfilling public information requests.
