Dashboards

Advantages

- Actionable insights from CAD, law enforcement, fire and corrections data
- Leverages Microsoft® Analytics and familiar Microsoft Excel® technologies
- Mapping capabilities for locating patterns and trends
- Key performance indicators help build policing strategies
- Mapping capabilities help locate patterns and spot trends
- Simplify fire accreditation reporting
- Intelligence is easily accessible on a tablet or iPad®

More intelligence for improved decision making

New World™ Decision Support provides law enforcement, fire and corrections agencies with actionable intelligence to make fast and fully informed decisions. It is an intuitive and effective solution that enables agencies to access the mountains of data they collect each day to report, trend, analyze and deliver information in multiple ways.

Answer questions quickly

Instead of just providing reports, New World Decision Support answers questions, helping decision makers improve organizational performance and response planning. Even users without a strong IT background can trend, pivot, drill down and through information. Users can analyze data across many dimensions, display the information visually through graphs and charts, then save and refresh all reports at a later date.

Information at a glance for command and COMPSTAT-based resource planning

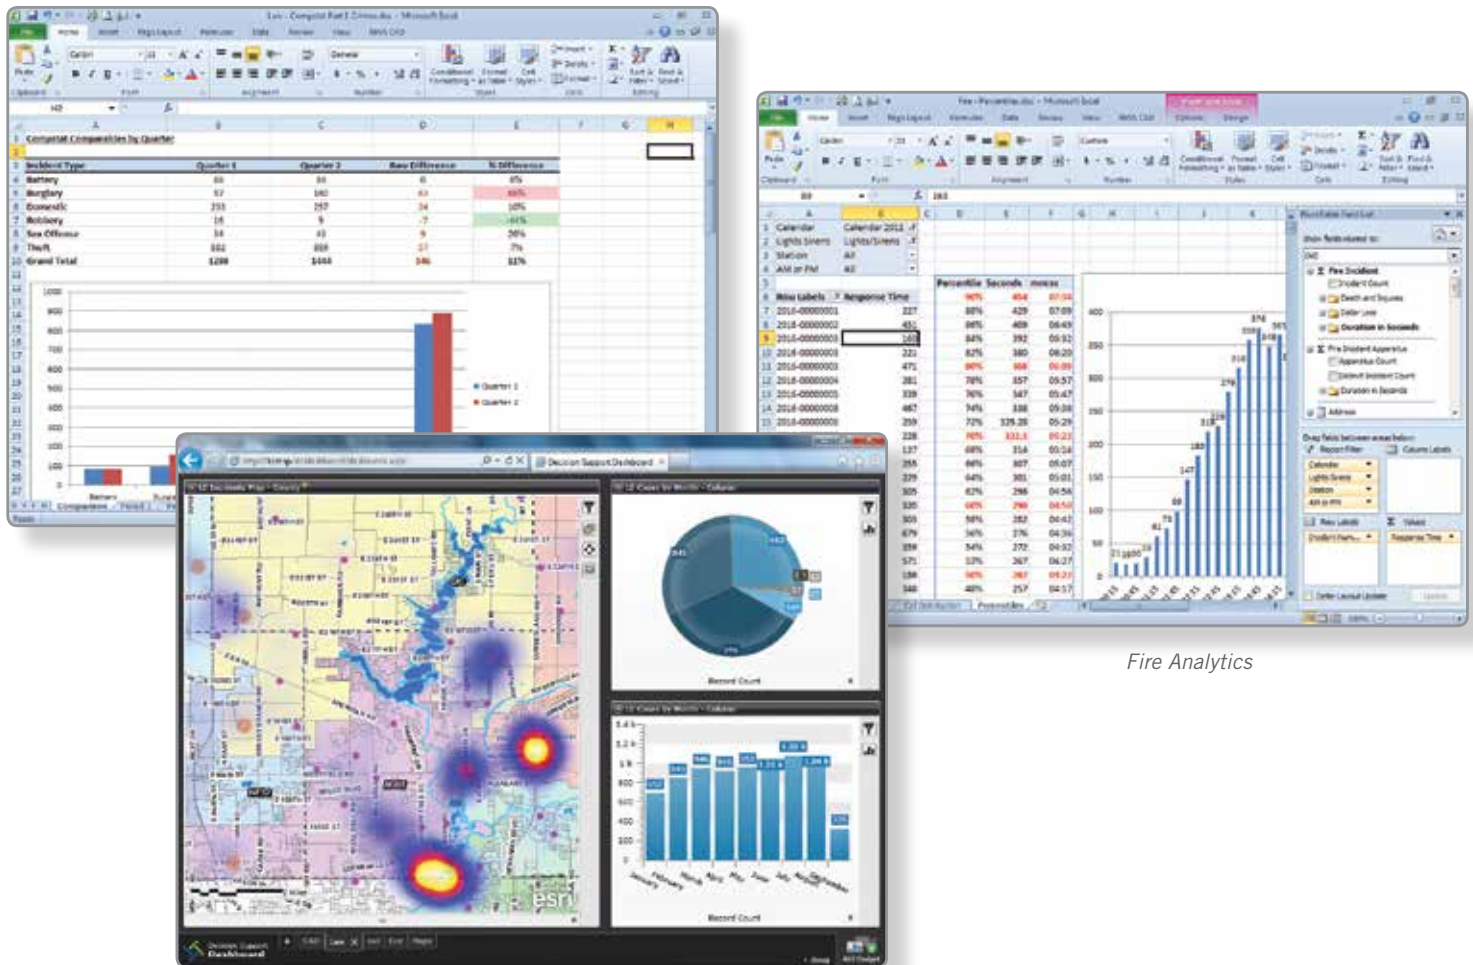

New World Decision Support dashboards provide a high-level overview of operations and the performance of an organization for supervisors and command staff. They offer instant access to statistics, graphs and maps, and allow users to drill deeper into areas of concern. Available anytime, anywhere, New World dashboards provide intelligence that improves resource allocation and enables agencies to do more with less by providing a window to developing trends.

Improve crime reduction initiatives and maximize agency productivity

New World Decision Support is a cost-effective tool to aid intelligence-led policing efforts. It streamlines crime and predictive analysis by helping users quickly locate trends and patterns to make staffing decisions and improve crime reduction programs. It also streamlines the reporting necessary for grant funding and CALEA accreditation reporting.

Software that commands.

COMPSTAT

Fire Analytics

Decision Support Dashboard

Simplify fire accreditation reporting and response time analysis

In addition to helping fire agencies evaluate response times and perform station analysis, New World Decision Support streamlines the complex fractal reporting needed to achieve and maintain fire agency accreditation. Fire agencies can conduct in-depth performance measurement and identify trends and commonalities between fire incidents. New World Decision Support also provides information tailored for analyzing EMS response times and actions taken, providing insight into how well EMS staff is responding to critical calls.

More information to streamline jail management

New World Decision Support provides the tools to quickly and easily analyze and report on bookings, releases and inmate details. With access to accurate and comprehensive activity and inmate information, corrections agencies can better manage jail population, monitor safety concerns and perform necessary reporting for state and federal compliance.

Software that thinks like you do.

Tyler Technologies (NYSE: TYL) is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to empower the public sector — cities, counties, schools and other government entities — to become more efficient, more accessible and more responsive to the needs of citizens. Tyler's client base includes more than 14,000 local government offices in all 50 states, Canada, the Caribbean, the United Kingdom and other international locations. Forbes has named Tyler one of "America's Best Small Companies" eight times and the company has been included six times on the Barron's 400 Index, a measure of the most promising companies in America. More information about Tyler Technologies, headquartered in Plano, Texas, can be found at www.tylertech.com.
