

Classroom 360

As schools rely more heavily on accurate data to make decisions, teachers are being asked to keep track of and report more real-time student data than ever before. These records can be vital to school decision-making, but regularly entering and updating that data can interfere with class time and seem like a second job. Teachers need to be able to quickly enter, access, and update students' school information without sacrificing classroom instruction.

Following the successful launch of Tyler SIS Student 360[™], a student information program for parents and guardians, Tyler SIS[™] offers a program designed specifically for teachers: Tyler SIS Classroom 360[™]. Classroom 360 and Student 360 share the same data and interface, avoiding duplicate data and repetitive entry and ensuring consistent student records. This intuitive touch-enabled browser app has a user-focused look and feel to deliver a seamless portal to connect many pieces of data at once. Classroom 360 is available to Tyler SIS clients at no additional licensing fee through Tyler's evergreen initiative, offering an improved user experience without a new implementation process or added fees.

Comprehensive

The Tyler SIS Classroom 360 portal provides access to the full spectrum of student information, including:

- Attendance
- Gradebook
- Report card grades
- Messaging
- Communication log
- Discipline referrals
- Seating charts
- Data query
- Preferences
- Access to all features of Student 360

Intuitive

Busy educators do not have weeks or months to familiarize themselves with new tools. Because the two programs share an interface and data set, Classroom 360 users will immediately recognize features and overall look and feel from their experience with Student 360. Teachers new to the programs can learn the basics of the Classroom 360 portal in a few hours, translating to less downtime and a smoother transition. Additionally, the Tyler SIS support portal contains a subfolder of Classroom 360-specific PDF documentation and brief instructional videos to learn, troubleshoot, and personalize the way student data displays.

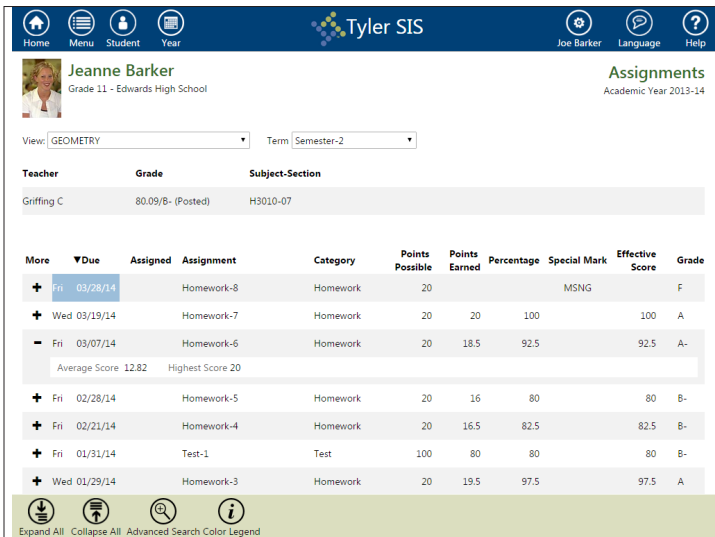

Benefits Include:

- Comprehensive student data
- Complete view of individual and classroom performance
- Web-based access available on Macs and PCs
- Intuitive, simple-to-learn interface
- Customizable preferences and reporting

Teacher-focused

Tyler SIS understands the pain points teachers experience when capturing and reporting on student data, and Classroom 360 was specifically designed to simplify life for teachers. Classroom 360 is designed to be simple to navigate, while providing the flexibility teachers need in a database. Users can set preferences that work best for how their individual classroom operates or the type of report they want to generate. For example, student names can be displayed alphabetically by first name or last name and year-long courses can be viewed in a single gradebook, rather than grouped by semester.

Student 360 and Classroom 360 work in unison from the same complete data set, fostering an alignment between students, parents, and teachers. With clearer cross-course student tracking and an ability to integrate with other learning enhancement partners, Classroom 360 is the ultimate solution to student data.

The screenshot shows the Tyler SIS Classroom 360 interface for a teacher named Jeane Barker at Edwards High School. The page displays assignment tracking for the subject of GEOMETRY in Semester 2. The interface includes a navigation bar with Home, Menu, Student, and Year options, along with user profile information and settings. Below the navigation, there are filters for View (GEOMETRY) and Term (Semester-2). The main content area features a table with columns for Teacher, Grade, Subject-Section, and a detailed assignment tracking table. The assignment tracking table includes columns for Due date, Assigned date, Assignment name, Category, Points Possible, Points Earned, Percentage, Special Mark, Effective Score, and Grade. The table shows several homework assignments and one test, with a summary row indicating an average score of 12.82 and a highest score of 20. At the bottom of the interface, there are icons for Expand All, Collapse All, Advanced Search, and Color Legend.

Teacher	Grade	Subject-Section
