

Textbook Inventory

Schools' focus is on student achievement, and for students to succeed they need the proper tools. Schools must ensure that each student has the textbooks and other learning aids they need to do their best. Now schools can be certain that students have just that.

With Textbook Inventory, part of the Tyler SIS solution (SISK12), it's easy to track books from one room to another, meet curriculum needs and be certain that each child has the books they need. Accurate and easy to use, the Tyler SIS Textbook Inventory solution helps manage text and reference books, keeping everything organized and available while controlling costs.

Features include:

- Automatically track serialized and non-serialized assets
- Transfer books and track asset allocation from one site or room to another
- Easily distribute books to students
- Automate return book process to assess standardized fines for lost or damaged books and automatically create real-time updates to Tyler SIS Fines and Fees
- Search by item title, department, section, status, student, serial number, site and room
- Streamline ordering to meet new curriculum headcount projections
- Produce reports such as Surplus Inventory and Distribution by Location
- Real-time management of textbook inventory and the associated business processes
