Odyssey Attorney Manager

For Prosecutors and Public Defenders
Odyssey Attorney Manager: More Than Just a Great Case Management System

Track and manage critical case information with ease and speed

The criminal justice process is complex, but the right technology will enable you to gain real-time access to critical case information, so that you can track, organize, and manage your caseload with efficiency and ease. That technology is Odyssey Attorney Manager™.

Part of Tyler Technologies’ integrated courts and justice solution, Odyssey Attorney Manager delivers robust features and functionality prosecutors and public defenders need to effectively track, organize, and manage a growing caseload.

Integrated Solutions — End-to-End Access to Critical Information

Odyssey is set apart from other court management solutions by its integration with Tyler courts and justice solutions, which provides you and your justice partners with end-to-end access to critical and sensitive information, when and where you need it. Integration with the court, law enforcement, and other agencies increases secure data sharing, eliminates redundant data entry, improves accuracy, and generates greater efficiency. You will have confidence that the information you’re accessing is accurate and up-to-date.

Odyssey’s integrated justice solutions seamlessly work together so you always have:

- Thorough, up-to-date information
- Real-time access to the right data
- Highly configurable security and other settings
Why Tyler Technologies

Proven Track Record of Success
Tyler knows the public sector like no one else. It’s our one, singular focus. We empower thousands of successful Odyssey courts across 900 counties in 24 states. This represents more than one-third of the nation’s population — 100 million citizens live in jurisdictions that have licensed Tyler’s Odyssey case management or e-filing solutions. Tyler has a proven track record of automating processes, eliminating paper, and driving efficiency. Committed to your success, Tyler provides you with the most current technology available, while protecting and extending your investment.

Knowledgeable Resources and Deep Expertise
Tyler has the financial stability and scale to allow us to invest in our products for the long term, including more than $40 million in R&D investment every year just to improve our products. We also attract the best people, utilize the latest technology, and implement best-in-class support and training systems. Our growing team of more than 600 dedicated courts and justice professionals has deep domain expertise in the public sector, and because we have had many successful implementations, we share best practices and knowledge to make your project more successful.

Our Mission
To improve our society by delivering holistic solutions to the justice community and the citizens it serves.

“Working with Tyler is knowing you have a partnership that helps you make improvements and become more efficient, and enables our day-to-day business operations to be completely automated.”

Brandon Dakroub,
First Assistant County Attorney,
Williamson County, Texas

Forbes ranked Tyler on their “Most Innovative Growth Companies” list for the past three years, and it has also named Tyler one of “America’s Best Small Companies” eight times.
Outstanding Training, Community & Support

Tyler University: Improve Knowledge and Train New Staff — 24/7

Tyler University (Tyler U) offers valuable job-related training that attorneys can access 24/7, from any location with internet access using a personal computer or a mobile device. Tyler U reduces the time, effort and cost associated with training your workforce by delivering comprehensive training curriculum tailored to your organization’s needs, based on Tyler’s comprehensive library of courses. The content is included in your maintenance agreement at no cost and is updated on a regular basis as part of Tyler’s evergreen philosophy. Tyler U enables existing and new staff to take full advantage of Odyssey.

- **New staff** can get up-to-speed quickly, and you can track your employee’s training and progress.
- **Existing staff** learn about Odyssey’s latest features and capabilities, increasing productivity.

Tyler Community: Answers and Advice from Tyler Experts and Your Peers

Some of the most valuable knowledge about Odyssey lies in the minds of our clients, as well as Tyler employees. These unique experiences and perspectives can benefit both users and Tyler staff, which is why we developed Tyler Community — an online collaboration community that allows participants to:

- Search forums, discussions, and wikis (online reference tool) to solve problems before submitting a support ticket
- Connect with peers and Tyler staff in a collaborative, interactive environment
- Ask questions and get answers from experts in other jurisdictions or Tyler staff
- Share best practices, ideas, and knowledge about Odyssey products and capabilities
- Make recommendations for product enhancements

More than 1,000 individual learning assignments across seven product centers.
Industry-Leading Support
As technology changes, your needs change. Service is at the core of what we stand for — that’s why we deliver leading-edge, end-to-end services and support. We are a reliable partner for the long term.

Support Services to Solve Your Unique Needs
Tyler provides valuable support services and resources, including a real-time help desk and related services that solve Odyssey clients’ immediate needs. These support services are response-driven. Issues are intelligently routed to a resource best suited to resolve the problem, are governed by Service Level Agreements (SLAs), and are always aligned with our commitment to provide you with technologically current products and reliable performance throughout the life of your Odyssey investment.

Gain Access to:
- **24/7 emergency support** — A toll-free number is available for emergency issues that occur outside of normal support hours (8 a.m.–5 p.m. CST), including catastrophic system issues.
- **Weekend support** — Saturday support is available for pre-scheduled system upgrades.

POST IMPLEMENTATION SUPPORT

Reactive
- Software Issues
- Configuration Updates
- System & Servers
- Install Assistance
- Critical Situation Process

Proactive
- Project Transition
- Post-Project Governance
- Account Management
- Learning Management System
- Release Planning
- Tyler Community

Tyler adds a “proactive” approach to industry-leading “reactive” support services. Reactive support services answer questions and resolve problems quickly. Proactive services help avoid problems and improve user sophistication in using Odyssey. When combined, they translate to clients who are more efficient and effective, resulting in customer satisfaction scores that far exceed the industry.
Constant Innovation Drives Continuous Improvement

With a goal toward securing long-term relationships with our clients, Tyler’s evergreen philosophy means we are always enhancing our products with the latest technology, and new product releases are available to clients at no cost. More than 150 developers work diligently to ensure that Odyssey remains the best system available. EverGuide® extends this commitment from just improving our software, to working proactively with our clients to create a plan to help them take full advantage of our software with process improvements, training, and other adjustments. The result: Odyssey clients improve their operations, year after year.

The Evolution to Electronic Processes
The fundamental shift from paper-based to electronic processes is not as simple as installing the latest version of Odyssey. All clients are unique, with their own set of needs and challenges. Tyler works with clients to create an approach customized for them — one that evolves over time. Tyler’s Attorney Manager Maturity Model is a tool we provide clients to develop a successful plan for evolving their offices from paper-based to electronic processes.
The Maturity Model scorecard identifies many key characteristics of an electronic office. By implementing the capabilities in the table and advancing toward the top of the chart, offices transform business processes, improving efficiencies and effectiveness.

</table>

“The Maturity Model is a valuable tool when developing a plan to evolve to electronic processes, allowing us to better handle our growing caseload and more efficiently perform daily tasks.”

Wes Wittig, Executive Assistant District Attorney, Fort Bend County, Texas
Shared Data and the Benefits of Integrated Justice

Shared data is the crux of Odyssey’s power, fueling core applications with unified case management, integrated document management, and improved workflow processes. Odyssey enables real-time information sharing between justice partners. Sharing data and workflows across agencies improves processes and efficiencies for all agencies involved. Every document and each piece of data — party information, events, warrants, charges, bail/bonds, fines, and fees — is organized, managed, and protected by Odyssey.

The Odyssey product suite provides complete and seamless integration from arrest through disposition. It also allows attorney offices to easily view court files and documents, and access a birds-eye view of criminal history, including prior arrests, warrants, bonds, cases, and probation status.
Tyler Alliance Leads the Way with an Integrated Approach to Criminal Justice and Public Safety Solutions

Tyler Alliance is a multi-agency, distributed platform that integrates public safety and criminal justice systems by connecting departments, agencies, and jurisdictions. The platform helps organizations break down barriers to make information sharing across public safety and justice agencies easy and secure. From dispatch operators, police on patrol, fire departments, and emergency services to corrections staff, probation officers, court clerks, trial judges, and prosecutors, improved information sharing enhances decision making, increases safety, automates processes, saves time, and reduces errors. Anchored by a common technical foundation, Tyler Alliance seamlessly connects Tyler products, enabling them to operate more collaboratively, and securely share data via connection points across multiple applications. Tyler Alliance allows organizations to obtain accurate information quickly and easily.

As part of Tyler Alliance, Odyssey Attorney Manager is completely integrated with Odyssey Case Manager™ for sharing and tracking court case information, such as party demographics, charges, and hearings, in real time. In jurisdictions where Odyssey Case Manager is used, attorneys and staff benefit when Attorney Manager is integrated with the case management system by receiving information on court hearings, judge assignments, sentencing, and much more. When Attorney Manager is integrated with Odyssey Jail Manager, prosecutor offices obtain information on new bookings.

Odyssey Attorney Manager is also a great solution in jurisdictions where there are no other Odyssey installations. Attorney Manager tracks cases and generates efficiencies with electronic case files, attorney assignments, maintaining statistics for grants, etc.

Court access to warrants from neighboring jurisdictions improves decision making, and shared party information reduces data entry and errors.

Fire and emergency service teams access information faster with improved investigative data and subject notifications.

Access to historical arrest records, aliases, open warrants, and known associations helps prepare officers for each incident response.

Jail staff require access to real-time data from associated criminal justice agencies, including outstanding warrants, charge, and bail details and sentence information.

Prosecutors and attorneys can make better decisions based on more detailed information — status updates, party data, hearing schedules, warrants, and more.

Supervisory staff use document management, automated reporting, forms processing, and probation tracking to simplify adult and juvenile probation.

Tyler Alliance makes information sharing easy across justice partners.
Attorney Manager — Powerful Tools to Effectively and Efficiently Manage Your Caseload

Odyssey Attorney Manager is designed to provide attorneys with the right technology to maintain, manage, and track case data and documents needed for hearing and trial preparation.

With Attorney Manager, you can easily:

- Generate documents, such as subpoenas, notices, and plea agreements using Microsoft® Word, pulling information from both the party and case record into documents without the need to re-key data.
- Customize language on offense codes for streamlined charging document production.
- Transform your office by integrating document management with case management.
- Create an electronic case file by scanning and storing documents, pictures, video, and audio files.

“Using Odyssey Attorney Manager, we can effectively manage our caseload with efficiency and ease, and all the critical information we need is at our fingertips.”

Dee Hobbs, County Attorney
Williamson County, Texas
Essential, Accurate, and Real-Time Case Data

Don’t let mounds of paper files, outdated technology, or underperforming applications slow down your processes and workflow. Odyssey Attorney Manager’s robust information engine drives faster, more accurate, and more detailed case data — all delivered through a solution that’s secure, intuitive, and easy-to-use.

Using Attorney Manager, users can review, gather, and track essential information for both criminal and non-criminal case types by utilizing case statuses, witnesses, victims, evidence, statistics, and related case information.

**Strong Data Protection**

The Attorney Manager electronic case file is secure, as is all the data it contains. Tyler’s robust security rights can be individually configured as you enter and update data and control access to sensitive documents. Users can also add restricted notes to cases and limit access to a specific organization or a group of users. Privileged data provides extra security to track a history of addresses, names, phone numbers, and employment. In an integrated environment, this data is not shared with the rest of the county.

---

**Attorney Manager for Prosecutors**

For prosecutors, Attorney Manager allows for the creation of charging documents, the maintenance of charge decisions and the ability to track asset forfeitures and protective orders. Secure data is fundamental. Prosecutors can ensure that pending charges are not viewed by other offices until they are filed with the clerk. The prosecutor’s office can also easily track and manage confidential information for the victims they are assisting.

---

**Attorney Manager for Public Defenders**

For public defenders, Attorney Manager provides an efficient and effective way to manage an attorney’s workload. Special features allow for the tracking statistics needed for grant funding. For integrated clients, Attorney Manager is unique in that it provides users with the ability to track data elements on a party that are not shared on the integrated party record. This ensures attorney/client confidentiality is maintained. For example, if a client provides updated address information, the public defender may not want to share that information with the sheriff’s office or prosecutor’s office.
Complete Access to Comprehensive Data Accelerates Efficiencies

Access to the Clerk’s Register of Actions
For clients with integration to Odyssey Case Manager, you gain access to the full register of actions for a court case with just a single click within the Attorney Manager case.

Comprehensive Summary Tab
Attorney Manager provides an overview of the entire attorney case record, including events and upcoming hearings. The Summary tab provides thorough information regarding offense stages, future case activity, case file tracking, case cross reference numbers, flags, actions due, and related cases.

![Comprehensive Summary Tab](image)
**Caseload Management**

Prosecutors and public defenders can manage and organize growing caseloads with enhanced case tracking functionality for criminal and non-criminal case types, ensuring you and your staff have all the critical information you need — court files, criminal history, demographics, and more.

**Protect Sensitive Information**

Odyssey has a concept known as “privileged party” that allows you to capture information on a party — names, addresses, phone numbers, email, and employment information — and provide a layer of security around that information. The security around privileged party data is more robust than the security surrounding any other data in Odyssey. The security scheme starts in the application, is further secured on the server, and is secured one more time at the database level. This process prevents circumvention of the Odyssey application to get directly to data in the database, meaning only persons with rights can view privileged party information.

**Configurable Statistics Tracking**

Configurable statistics tracking provides an easy and immediate way to collect and report on important data. Simple yes or no, multi-valued selections can be configured to match grant requirements.

*For example:*

- Military veteran? Yes or no
- Branch of service? Army, Navy, Marines, or Coast Guard

A standard report produces statistics over a date range, and can be exported to a CSV format and used with Excel®.
Individual Workspaces

You can easily create and access a customized view showing information that’s most important — caseload, hearings, and more — from a single, user-friendly screen, without having to run reports. It provides summarized views of important data that is contained within widgets, mini applications that runs within Odyssey, which allow users to personalize the way they see information. Dynamic widgets can be easily added to a user’s workspace. Users view configurable widgets that display their workload in real-time, based on pre-defined parameters. The hearing widget displays a list of upcoming hearings for cases assigned to the user logged into Odyssey. The active caseloads widget displays a list of active cases assigned to the user logged into Odyssey.

Streamline Operations

Odyssey has several features that allow you to customize the way the system operates to fit the way you work, automating tasks, and helping you work smarter and more efficiently.

Time standards enable you to adhere to statutory and local rules.

Task Manager supports notifications, document routing, calendaring, and subpoena processing.

- Tasks can be added automatically or manually.
- Tasks can be assigned due dates, and users can set up alerts when hearings are scheduled.
- Users can link to the case or a specific tab of the case in Odyssey.
- Users can share notes on a specific workflow item.
- History is tracked on an item, including the timestamp and the user who worked on the item.
- Multiple users can work document queues to speed up the data entry process.

A full-featured calendaring system allows users to better manage and conduct grand jury, investigations, and deposition scheduling.

With subpoena processing, users maintain witness lists, issue and print subpoenas, and track service statuses.

Streamline, Organize, and Share Important Information

Odyssey’s workflow facilitates document routing. Odyssey’s Enterprise Document Management System (DMS) Batch Scanning feature allows a user to scan in stacks of documents, double-check them for quality, and upload the images into multiple work queues based on the type of document. Work in the office or remotely to perform data entry from scanned images and attach the images to the records. Important documents can be sent to workflow queues based on their type, which increases the speed of data entry and ensures documents are handled in a timely manner. In addition, batch processes allow notices to be printed for court sessions and configured for the type of party receiving the notice.
Prosecutor Features

Increase Collaboration and Efficiency with eCharging

eCharging is a time-saving feature that uses the web to enable law enforcement officers to view incident details, and electronically file them to prosecuting attorneys. The eCharging feature is a fully integrated collaboration platform that facilitates an effective and efficient workflow between law enforcement officers and prosecuting attorneys.

Incident details, such as defendant demographics, offense data, and evidence, are sent through the Odyssey Portal, resulting in better data accuracy, increased tracking, and improved efficiency and collaboration.

Once incidents are submitted, they can be approved for prosecutor case creation or returned to the law enforcement officer requesting additional details. When an incident is accepted, it automatically updates the status to accepted in the Odyssey Portal.

Building Complex Charging Instruments with Charging Paragraphs (with Multiple Counts)

Configure charging paragraphs on each statute code that can contain custom prompts.

Example: “Did unlawfully possess a controlled substance, to wit: <<prompt>>” — where the prompt can be a party’s name from the case, a drop down of custom values, or a free form text box. When the paragraph is pulled into the charge, the user is prompted to apply any substitute text, and then that entire paragraph can be inserted into multiple documents. The form can be configured to pull in multiple counts and/or allow for multiple defendants from related cases to be pulled into a single document.

List Manager Actions

List Manager is a tool that provides a way to batch-update cases and print forms without having to access each case record individually. For example, users can add the same event to a group of cases, print notices, and transfer the caseload from one staff member to another. You can update all declined charges from the day’s grand jury sessions. Then, the action can be run against the list to batch-update the decision.
Move to an Electronic Office

Generate Documents

Documents are configured as form templates in Odyssey Attorney Manager. Templates are Word documents that pull in data from a case through bookmarks called tokens. The form templates can be maintained by users with the appropriate security rights and multiple versions can be created as needed. Forms can be created for any document and can populate data, such as case information and address information, by inserting tokens into the form template. They can be generated on demand or in batch through the List Manager feature.

Electronic Signatures

Electronic signatures streamline office processes and empower users to effortlessly capture an electronic signature on forms that are generated from within Odyssey. Users can merge forms using Odyssey’s integration with Microsoft Word and send those forms to attorneys’ queues for insertion of electronic signature(s). Once electronically signed, the documents are converted to PDF or TIFF for permanent storage. When an electronic signature pad is used, non-Odyssey users can sign existing documents associated with cases. Users can specify the area in the document to be signed, resize, move the signature, accept or decline the signature, and then save the document to make the signature permanent.

Electronic Filing

Odyssey File & Serve takes one of the most time-consuming and tedious tasks facing law offices — document processing and filing — and transforms it into a simple task that only requires the click of a mouse. This powerful technology eliminates the cost and manpower required to print, copy, secure, store, deliver, and file legal documents.

In contrast to traditional filing, e-filing saves:

- **Time** — Average filing time drops from seven minutes to one; plus, no more waiting in long lines.
- **Travel** — Anywhere, anytime online access means no more trips to the courthouse or elsewhere.
- **Costs** — Users reap the cost-saving benefits of streamlined document processing.

In addition, Odyssey File & Serve breaks traditional constraints of document management and filing with:

- **Online tracking and proof of delivery**
- **24/7 filing and access to documents via a secure web portal**
- **Courtesy copies at no additional charge**
- **Advanced search functionality indexes, bookmarks, and finds documents in seconds**
Access Discovery Information Anytime, Anywhere

Odyssey’s eDiscovery allows prosecutors to send discovery electronically to defense attorneys. Public defenders can access, view, and download discovery via the web, from a PC or mobile device, resulting in improved efficiency and increased convenience.

**eDiscovery Benefits for Prosecutors and Public Defenders**

- Automates the discovery process by enabling defense attorneys and prosecutors to electronically share and view evidence provided by the prosecuting attorneys about a case
- Provides a full audit trail to see the date and time when the prosecutor shared discovery, and see when the defense attorney viewed the discovery on the web
- Eliminates paper while ensuring a more open discovery process

**For Prosecutors**

- Saves time making copies of discovery
- Provides the ability to indicate the availability of media that is not electronic, and how the evidence can be viewed or obtained.

**For Public Defenders**

- Streamlines the criminal justice process
- Saves time driving to the prosecuting attorney’s office and waiting in long lines
- Provides access to discovery information, available on the Odyssey Portal — 24/7
Robust Reporting Enables Real-Time Decision Making

Standard Reports
Robust reporting capabilities are an integral part of Odyssey Attorney Manager, offering a comprehensive collection of reports to support attorney functions, including caseloads, statistics, event activity, time standards, and more. Reports can be easily modified to summarize parameters, online previews, scheduled processing, and automatic emailing to one or more parties.

Integrated Enterprise Custom Reporting
Enterprise Custom Reporting (ECR) provides an intuitive mechanism to create ad hoc, custom reports (using Microsoft® SQL Reporting Services) without the added expense or time requirements associated with an external report writer. You can save and publish these reports in .CSV or .PDF formats for future use. Reports and hard-copy documents can be converted to TIFF image file format for long-term storage and easy access.
Software that thinks like you do.

Tyler Technologies (NYSE: TYL) is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to empower the public sector — cities, counties, schools and other government entities — to become more efficient, more accessible and more responsive to the needs of their constituents. Tyler's client base includes more than 15,000 local government offices in all 50 states, Canada, the Caribbean, the United Kingdom and other international locations. In 2017, Forbes ranked Tyler on its “Most Innovative Growth Companies" list, and it has also named Tyler one of “America's Best Small Companies" eight times. The company has been included six times on the Barron’s 400 Index, a measure of the most promising companies in America. More information about Tyler Technologies, headquartered in Plano, Texas, can be found at www.tylertech.com.
