# odyssey®
a tyler courts & justice solution

Odyssey Supervision

Tyler's Odyssey Supervision™ module is the standard for comprehensive pre-trial, probation, and drug and specialty courts management for both adults and juveniles. This easy-to-use, single tool automates your workload, eliminating the need to use multiple systems to track and modify offender and case information. From document imaging and reporting to supervisory functions and forms processing — Odyssey Supervision does it all.

- Integrated forms generation
- Document management
- Caseload and phase management
- Assessment and drug test tracking
- Contact scheduling features for officers
- Workflow and task management

Integrated Solution

The Supervision workspace is tightly integrated with Odyssey Case Manager™ for sharing critical information and documents, such as party demographics, charges, hearings, and financials. Odyssey Supervision helps supervision offices reduce redundant data entry or manual data searches, as well as increase efficiency and provide more accurate information.

Odyssey's integrated structure enables information sharing across all justice partners — courts, attorneys, the public, and justice agencies.

Empower Your Office with Odyssey Supervision

Tyler's Odyssey Supervision application sets the standard for court supervision with unprecedented scalability, integration capabilities, and web-based navigation.

To help you create greater efficiencies, Supervision supports a variety of offices:

- Probation
- Pre-trial
- Juvenile probation
- Specialty courts

Empowering people who serve the public®

tyler technologies

Tyler's Odyssey Supervision (cont.)
Comprehensive View of Cases

Supervision is a full-featured, adult case tracking and juvenile referral and case tracking system. Integrated forms processing enables you to produce complex documents, such as motions to revoke probation, including custom paragraphs for specific conditions. The application's powerful document management functionality ensures that supervision information is accurate, giving you the full picture. You can easily track parties' compliance with conditions, drug testing history, and treatment placements, as well as configure risk and needs assessment questionnaires to meet your specific needs.

Complete Financials

Integrated access enables you to view any fees that clerks are collecting and monitor fees that you are collecting. You can also track fees as they are levied and collected.

Flexible and Intuitive

Supervision officers can utilize contact scheduling features via an integrated workspace, as well as view current caseloads and the day's hearings and contacts. Available party information extends to relationships, institutions, and places of employment. Relevant information displays in an intuitive interface with streamlined data sharing capabilities so that you don't waste time searching for or re-entering critical data. With Odyssey Supervision, you can also perform List Manager queries and actions for mass updates. You can even reassign an officer's caseload to another and print letters for all defendants who missed their contacts on a given day.
