

Document Pro

Document Pro[™] offers a robust and scalable solution to your land and vital records needs. Developed within the Microsoft[®].NET Framework, Document Pro is designed to simplify tasks and improve efficiency through a completely integrated imaging system along with a variety of other key features.

Key Features

- Robust search capabilities, including searches by date, document number, party information, relating documents or legal entries.
- Batch scanning allows you to enter multiple images into Document Pro using a barcode system, allowing you to access multiple images and image tools at once.
- Security Manager provides extensive control over assignment of permissions and access to features in Document Pro.
- Reporting features allow you to track money and document entries, as well as create custom search reports, track the time of completion for documents and generate a number of state-specific reports.
- Advanced customer account tracking allows the use of debit, credit and cash-only customers.
- Customer statements and invoices allow you to generate customer-specific reports quickly and efficiently.
- Receipting integration simplifies the recording process by automatically generating documents at the time of receipt creation.
- Emailing feature allows you to save time and money by electronically sending images and customer statements.
- Fully integrated eRecording and auto-indexing capabilities.
