

Create an interactive game world where your friends can play
Solve a problem in your community
Teach valuable skills in an interactive way
Help build your future with the Maine App Challenge!

About the Challenge

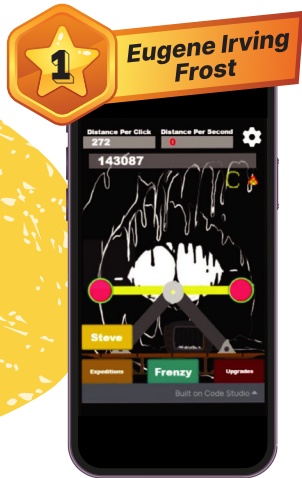

In cooperation with the University of Maine, Tyler Technologies' Maine App Challenge provides the opportunity for Maine students to explore the world of software design and development.

Show off your technical and creative skills by building a mobile application.

Students have the chance to win scholarships, learn basic coding, and gain career-related experience to strengthen their college applications and resumes.

Winners of the 2025 Maine App Challenge!

Prospect: Re-Appraisal is an accessible, yet challenging game featuring original art and music

StudyBuddy is an app integrated with Google Classroom to allow students to easily track their course progress

Investment Investigator is a personalized tool that suggests interest-bearing account investments
