

Advanced Functionality Device

Model: TouchTime[®] III

The TouchTime[®] III electronic time clock data terminal integrates with ExecuTime Time & Attendance and provides advanced time tracking functionality for staff and managers. Employees can use the keypad to review a summary of their time in current and previous pay periods, approve their time, view leave time balances, request time off, and allocate hours towards projects, grants, various positions, and more. TouchTime III can be configured for keyboard access, badge readers, or fingerprint access, and has a continuous power source that will operate through periodic outages.

Model: TouchTime III

TouchTime III Device Specifications

Memory

- Windows 10 IoT enterprise LTSB (64 bit)
- 64GB internal storage
- Intel Atom[®] x5-E8000 quad core

User / Communication Interface

- 10.1" 5-point multi touch HD
- Capacitive display, 16:9 aspect ratio
- WiFi (802.11a/b/g/n)
- Bluetooth
- Ethernet 10/100

Auto-ID

- 2 internal reader ports
- Barcode
- Magnetic
- Proximity (HID)
- Smartcard (iCLASS[®])
- Biometrics (fingerprints)

Physical

- 12.0 x 8.75 x 3.78 inches
- Approximate weight is 6.4 lbs. with wall mount and battery
- Ambient light sensor

Environmental

- Operational temperature is 5°C to 35°(41°F to 95°F)
- Storage is -20°C to 65°C (-4° to 149°F)
- Humidity is 20% to 80% non-condensing
- Electrostatic discharge is a minimum of 8 KV

Power

- VDC is 12V 2.08A power rack
- Power over ethernet is 802.3 at PoE+

Features

- Clock in and out
- Employees can be identified using their keypad, badge, or fingerprint
- Review a summary of time
- Approve and request time off
- Review leave time balances
- Allocate hours to projects, jobs, positions, pay codes, and more
- Includes Power over Ethernet (POE), battery backup, and wireless internet
