Advanced Functionality Device

Model: TouchTime® III

The TouchTime® III electronic time clock data terminal integrates with ExecuTime Time & Attendance and provides advanced time tracking functionality for staff and managers. Employees can use the keypad to review a summary of their time in current and previous pay periods, approve their time, view leave time balances, request time off, and allocate hours towards projects, grants, various positions, and more. TouchTime III can be configured for keyboard access, badge readers, or fingerprint access, and has a continuous power source that will operate through periodic outages.
