Medical Marijuana Regulation

Powered by **entellitrak**

Debilitating Medical Conditions A Cautious Approach to Relief

The proliferation of state laws governing medical marijuana use has created the need for systems to manage patient and other stakeholder registries. Regulators need dynamic software that is tailored to this unique regulatory challenge and diverse set of participants.

A Unique Regulatory Challenge

While difficult to calculate, an estimated 1.2 million patients use medical marijuana where it is legal in the U.S. — currently in 25 states and the District of Columbia. Despite sharp disparities in state marijuana laws, regulators share the need for a case management system that will adhere to medical regulations, evolve with new legislation, provide secure data access to authorized individuals, and scale to handle growing case volumes. Common elements include:

- A confidential registry for residents who qualify for medical marijuana use and their caregivers
- A registry for physicians who are approved to certify patients for the program
- A self-service portal for patients, physicians, caregivers, and legal agents

How It Works

MicroPact's Medical Marijuana Regulation solution is designed to process patient and caregiver applications, renewals and payments while ensuring efficient registration and enforcement. Upon approval, patients can print their own barcoded, tamper and fraud resistant ID cards or display them on a mobile device. Caregivers can verify their total number of assigned patients and plant count in real time. For added verification, the system can be configured to require live scan fingerprints and criminal background checks for patients, caregivers, dispensers, and cultivators.

System administrators and other authorized individuals can continually configure the solution to keep up with evolving legislation — without requiring code changes.

Meeting the Toughest Standards

- » HIPAA privacy standards
- » ADA standards & Section 508 Accessibility standards
- » FISMA Information Security guidelines
- » NIST Special Publication 800-53
- » Federal and state-level Information Assurance standards

FREE Prototype Offer

The best way to understand entellitrak is with a prototype.

Once we confirm that entellitrak is an appropriate solution, we can build a custom prototype based on a process of your choosing.

SOFTWARE THAT THINKS LIKE YOU DO.

MicroPact is a wholly owned subsidiary of Tyler Technologies, the largest company in North America dedicated to providing software for the public sector, including federal, state, and local government. Tyler is a nationally recognized provider of integrated system solutions and professional services and serves clients in more than 21,000 installations across 10,000 state and local government locations in all 50 states, Canada, Puerto Rico, the United Kingdom and Australia, as well as more than 200 U.S. federal agencies. Acquired by Tyler in February 2019, MicroPact has focused for more than four decades on delivering powerful, adaptive, commercial off-the-shelf (COTS) solutions to the public sector. Today, MicroPact products serve 49 U.S. states and 97% of federal agencies with 500 or more employees. Tyler has more than 21,000 successful installations across 10,000 sites, with clients in all 50 states, Canada, the Caribbean, Australia, and other international locations. A financially strong company, Tyler has achieved double-digit revenue growth every quarter since 2012. It was also named to Forbes' "Best Midsize Employers" list in 2018 and recognized twice on its "Most Innovative Growth Companies" list. More information about Tyler Technologies, headquartered in Plano, Texas, can be found at tylertech.com.
