# Contract and Acquisition Management

Powered by

entellitrak

## Streamline Contract Management Maximize Opportunities

The entellitrak Contract and Acquisition Management solution automates all “cradle-to-grave” contract formulation, management, and execution phases under one integrated system. These phases include planning, requirements, pre-solicitation, solicitation award, contract administration, and close-out — everything you need for comprehensive, cost-efficient contract and acquisition management. The Contract and Acquisition Management solution is specifically designed to be utilized by federal contracting offices.

### Focus on Essentials

entellitrak provides a centralized repository to enter, retrieve, manage and view contract and acquisition related information. Knowledge at your fingertips gives you the ability to respond quickly to internal and external information requests. The entellitrak solution places each contracting action in its respective workflow, tracks it and sends reminders for completion of processing events.

### Contract and Acquisition Features

As a fully integrated data tracking and management system, entellitrak eliminates the need to integrate 3rd party applications through a comprehensive set of available modules and built-in tools:

- » Pre-configured for contract and acquisition management
- » Workflows tailored to contract types
- » Contract creation
- » Contract tracking
- » Contract change request / modification
- » Advanced text search capabilities
- » Able to post opportunities to public web sites and verify funding
- » Tools to securely manage vendor and subcontractor interaction
- » Configurable contract compliance, performance and risk tracking

## Visualize Results

entellitrak supplies data visualization and analysis tools that turn records into actionable information. Visual indicators show the status of contract events and help avoid process bottlenecks. Out of the box, entellitrak comes with predefined reports for contract management. Additionally, reports specific to your organization can be built and saved with the application. An ad hoc report writing feature also allows for custom reports on the fly.

## Build Momentum

Team members can view all of the contents of the entellitrak Contract and Acquisition Management relational database as well as the definition of every configurable element. This approach makes it easy to access and manipulate each and every data component. Even without the help of developers, your organization will be able to independently and continuously configure the system to your ever-evolving needs.

## Move Quickly

Unlike other case management solutions, entellitrak's open architecture exposes all layers of its structure, allowing streamlined integration with other applications. The architecture is comprised of a user interface, application lawyer and database layer. This simple, open approach makes it possible for entellitrak to be staged from any platform and to communicate easily with external systems related to the contract and acquisition management process.

### entellitrak Modules

- » Document Management
- » Analytics
- » efile (External User Portal)
- » escan (Direct Document Scanning)
- » Mobile

## FREE Prototype Offer

The best way to understand entellitrak is with a prototype.

sales@micropact.com

Once we confirm that entellitrak is an appropriate solution, we can build a custom prototype based on a process of your choosing.

## SOFTWARE THAT THINKS LIKE YOU DO.

MicroPact is a wholly owned subsidiary of Tyler Technologies, the largest company in North America dedicated to providing software for the public sector, including federal, state, and local government. Tyler is a nationally recognized provider of integrated system solutions and professional services and serves clients in more than 21,000 installations across 10,000 state and local government locations in all 50 states, Canada, Puerto Rico, the United Kingdom and Australia, as well as more than 200 U.S. federal agencies. Acquired by Tyler in February 2019, MicroPact has focused for more than four decades on delivering powerful, adaptive, commercial off-the-shelf (COTS) solutions to the public sector. Today, MicroPact products serve 49 U.S. states and 97% of federal agencies with 500 or more employees. Tyler has more than 21,000 successful installations across 10,000 sites, with clients in all 50 states, Canada, the Caribbean, Australia, and other international locations. A financially strong company, Tyler has achieved double-digit revenue growth every quarter since 2012. It was also named to Forbes' "Best Midsize Employers" list in 2018 and recognized twice on its "Most Innovative Growth Companies" list. More information about Tyler Technologies, headquartered in Plano, Texas, can be found at tylertech.com.
