Total school solutions
one vendor, three benefits
School districts as integrated enterprises

As we see it, an educational system is comprised of many distinct functional areas: the classroom, the business office, the transportation department, the superintendent’s office and so on. Together, they are a system — a set of interacting entities with deep relationships that form an integrated enterprise.

This is Tyler’s unique advantage — our ability to provide multiple school solutions from a single company.
Saves Money

Save Money by Working with a Single Vendor

- Discount with purchase of multiple Tyler products
- Discount on hosting services of multiple Tyler products
- Additional service contracts cover multiple products with ceiling limit
- Evergreen development solutions deliver long-term ROI
- Cloud-based solutions save hardware and personnel expenses

A Vendor You Can Trust

Our reputation is built upon delivering what we promise: completing our implementations on time and on budget, keeping your investment current and providing high quality client support.

- 100 percent of our efforts and commitments are aligned with the public sector
- Publicly traded on the NYSE ensures a high degree of accountability and transparency
- Financially stable with the resources to provide exceptional products and services

Our expertise is a direct result of more than 30 years of innovation and dedication to school solutions.

Technology That Never Leaves You Behind

Tyler’s evergreen development philosophy safeguards your investment from obsolescence through a series of ongoing product updates, enhancements, platform upgrades and incremental introduction of new technologies — without having to pay relicensing fees.
Provides Dynamic Data Integration

Enter Data Once

- Applications that share data dynamically create a significant reduction in redundant data entry and tasks
- Many of our applications use Active Directory, allowing you to just log in the first time

Information Delivered in a Quick and Consumable Format

Our data analytics tool, Tyler Pulse, aggregates student information, financial, student transportation and workforce data from Tyler’s applications to provide an enterprise view of everything from identifying at-risk students and student achievement, to evaluating teacher effectiveness, measuring transportation key performance indicators and examining budget versus actual costs per student.

Our unique collection of software and services can improve efficiency in every area of school management.
Our solutions are used by more than 5,000 school districts in the U.S. and Canada.

Saves Time

One Contract to Manage — One Maintenance Agreement to Pay — One Number to Call

Position Clients for Success

Tyler’s implementation phase positions clients for success using best business practices, streamlining workflow processes and meeting organizational objectives.

With Tyler, you can minimize administrative challenges with one support call escalation procedure, one disaster recovery service, and one operating system and database management service.

Empower Clients with Multifaceted Support

We empower our clients to find the answers to their questions on their own terms.

- In-program help
- Web-based knowledgebase
- User groups
- Tyler University — our e-learning system for end users
- Tyler Community — our peer-to-peer community for forums, blogs, libraries and wikis
- Tyler Connect — multiple solutions, just one annual conference
**Software that thinks like you do.**

At Tyler Technologies (NYSE: TYL), we have a single mission: enable the public sector to be more efficient, more accessible and more responsive to the needs of citizens. That’s what we do. And that’s all we do — in partnership with more than 11,000 clients, including local government and school offices in all 50 states, Canada, the Caribbean, the United Kingdom and other international locations.

Tyler Technologies is a leading provider of information management solutions and services for the public sector — and Tyler is the largest company in the country solely dedicated to providing software and IT services to the public sector market.
