

eCitation – Flexible, Easy and Fast

Brazos™ from Tyler Technologies provides the most technologically advanced mobile electronic citation solution on the market today. All of our solutions are built upon an extremely powerful architecture that provides complete flexibility for our clients with no required changes to existing IT infrastructure.

Rather than writing citations by hand, which requires re-entry into the court and police records management systems, Brazos gives officers the ability to enter citation information directly from their electronic device. This electronic information is then automatically uploaded into the agency's system.

Features:

- Entire application is 100 percent tailored to each agency
- Operates on any device with a Microsoft® operating system (MDC, PDA, cell phone, etc.)
- Auto-fills suspect information from any DL or query returns
- Auto-fills vehicle information from VIN, registration sticker and/or query returns
- Provides complete citation, statistical and mapping reports
- Integrates with any police records management system, court or custom application
- Synchronizes the device over 802.11 a/b/g, cellular or batch connections
- Includes optional hosted or installed back-end collection and reporting

Ease of Operation

Since all screens and ticket layouts are tailored to each agency, your officers are able to recognize the fields and quickly adopt the technology. Many data entry options speed up the process of filling out the citation:

- Interface with existing mobile query software (NCIC returns)
- Read the 2D driver's license barcodes and magstripes
- Read VINs and registration stickers
- Pre-load streets, offenses and many other fields

Benefits:

- Reduces time spent on traffic stops
- Increases officer and violator safety
- Eliminates data entry errors on citations
- Eliminates data entry into court and police systems
- Reduces total cost of processing citations
- Requires minimal IT support

Tyler's Brazos handheld technology eliminates data entry into court and police records management systems.

Most Complete Solution Available

eCitation is a fully functional electronic citation system that can connect to any existing system and run on any device with a Microsoft® operating system, such as MDCs, PDAs or cell phones. This flexibility allows each agency to tailor the solution to maximize the value of an existing or new hardware or software investment.

eCitation provides the back-end data collection and reporting capabilities in both hosted and locally installed models to accommodate the needs of agencies of all sizes. The solution is built for growth and flexibility. It is not simply an electronic citation solution, but is built on an enterprise platform from which you can manage all of your handheld mobile devices.

Microsoft is a registered trademark of Microsoft Corporation in the United States and other countries.

You can change the look and feel of the screens, add new users and devices, customize ticket printouts and much more — all from our Web-based design and management platform.

Outstanding Support

Tyler Technologies provides outstanding customer support before, during and after the purchase of our solutions for all of our clients to ensure you receive the full value of your investment today and over the long term.

Minimal IT Support Required

For more than 15 years, Tyler's Brazos product has focused on mobile data collection and we continuously incorporate features to further your software's long-term viability and relevance. No change to your current IT infrastructure is required to implement our solution. You'll benefit from full administrative functionality to manage all users, devices, business rules and fields with no intervention from us.

A Trustworthy, Long-Term Partner

Tyler Technologies prides itself on delivering world-class solutions and becoming a true partner with our clients. When you purchase software solutions from Tyler, you aren't just getting the latest software as of the date you sign your contract. You also receive the benefit of perpetual upgrades as they happen without additional license fees.
