Infinite Visions Mobile Management Console

Tyler's Infinite Visions[®] Mobile Management Console puts decisionmaking power at your fingertips. Whether you're in a meeting down the hall, an appointment on the other side of the district or traveling to another state, the Infinite Visions Mobile Management Console application gives school business managers and decisionmakers remote access to the important financial and personnel information you rely on every day.

Functionality you need when you're on the go

Your software functionality needs are different when you're away from your primary computer. You need quick access to respond to time-sensitive processes such as approvals, requests and requisitions. Real-time updates from your Infinite Visions servers keep you connected while you're away from your office. The application provides intuitive processing to respond to, approve or reject:

- Timecards
- Invoices
- ePARs
- Budget Adjustments
- Employee Leave Requests
- Warehouse Requisitions
- Purchase Requisitions

Information is just a finger tap away

Designed as a native mobile application, the intuitive interface is optimized for internet-enabled touch tablet devices such as Apple iPads[®] and Windows[®] 8 tablets. Familiar tap, swipe and pinch gestures navigate you through at-a-glance analytics.

Access to accurate, real-time information is essential to making decisions on the go. The Infinite Visions Mobile Management Console provides one-touch access to:

- Employee and Department Directories
- Staff Availability Calendars
- Budget and Accounting Indicators
- Service Anniversary and Birthday Alerts

System security keeps mobile data protected

The Mobile Management Console runs independently of the server-based Infinite Visions system and maintains a real-time connection through available 3G and 4G networks or WiFi connections. The mobile application utilizes the same secure login and password credentials as your primary system — only allowing authorized personnel to access and process data from their mobile devices.

Having access to accurate real-time information and the ability to respond quickly to time-sensitive business issues is a priority for any K-12 school district. The Infinite Visions Mobile Management Console provides your business managers and decision makers the right technology to stay connected in today's increasingly mobile work environments.

Empowering people who serve the public[®]
